

## CLEANING AND WASTE MANAGEMENT REGULATIONS

Fira de Barcelona has a comprehensive cleaning and waste removal service. This service can be hired through the Fira de Barcelona Sales Department ([www.servifira.com](http://www.servifira.com)).

The IASLC 2019 World Conference on Lung Cancer Secretariat is responsible only for keeping the shared space clean, including the aisles between exhibit booths.

The exhibitor must pay the costs of the general cleaning service for the contracted spaces and the corresponding access points.

### 7.1. Stand cleaning

With regard to requesting additional cleaning services (vacuuming, washing, cleaning glass and vertical surfaces, etc.), these shall be hired through the Fira de Barcelona Sales Department ([www.servifira.com](http://www.servifira.com)). This cleaning shall be carried out at night to minimize the impact of the service during show days.

Exhibitors who decide to use a cleaning service other than Fira de Barcelona shall duly verify their personnel, and the service must be carried out during the time established by the exhibitor and the electrical connection requirements must be fulfilled for the installation of the stand.

For the stands that are not properly cleaned, Fira de Barcelona reserves the right to clean them at the cost of the exhibitor.

### 7.2. Waste removal

The company responsible for the construction or decoration of the stand will be responsible for removing the waste generated daily, during both the build up and break down periods.

The fire prevention policy prohibits the accumulation of waste in the stands and their storage areas, as well as in the corridors and common areas. For this purpose, the build up contractors can have a waste container inside the venue. Waste must be removed at the end of each day. Only the collection of material within the limits of the stand is permitted.

The removal of generated waste can be managed through one's own means or by hiring the service through the Fira de Barcelona Sales Department ([www.servifira.com](http://www.servifira.com)). Waste removal companies other than Fira de Barcelona must be verified in order to offer their services in the venue and to pay the corresponding fees required to gain access.

It is not permitted to use the bathroom sinks for the build up and break down work; the indicated industrial sinks must be used for these activities. Remember that batteries, oils, light bulbs, paint, solvents and, in general, any toxic or chemical product must be duly recycled.

**#WCLC19**

Conquering Thoracic Cancers Worldwide

At the end of the break down period, the contracted surface must be completely clean, which includes removing the adhesive carpet tape and any other material. Once this period has finished, the stand exhibitors that still have waste will be charged the cost of cleaning and waste removal to restore the conditions of the contracted space.
